

I'm willing to fight for Test
Automation...
And I think you should too!

Tine Starič

Software Architect @ Companial

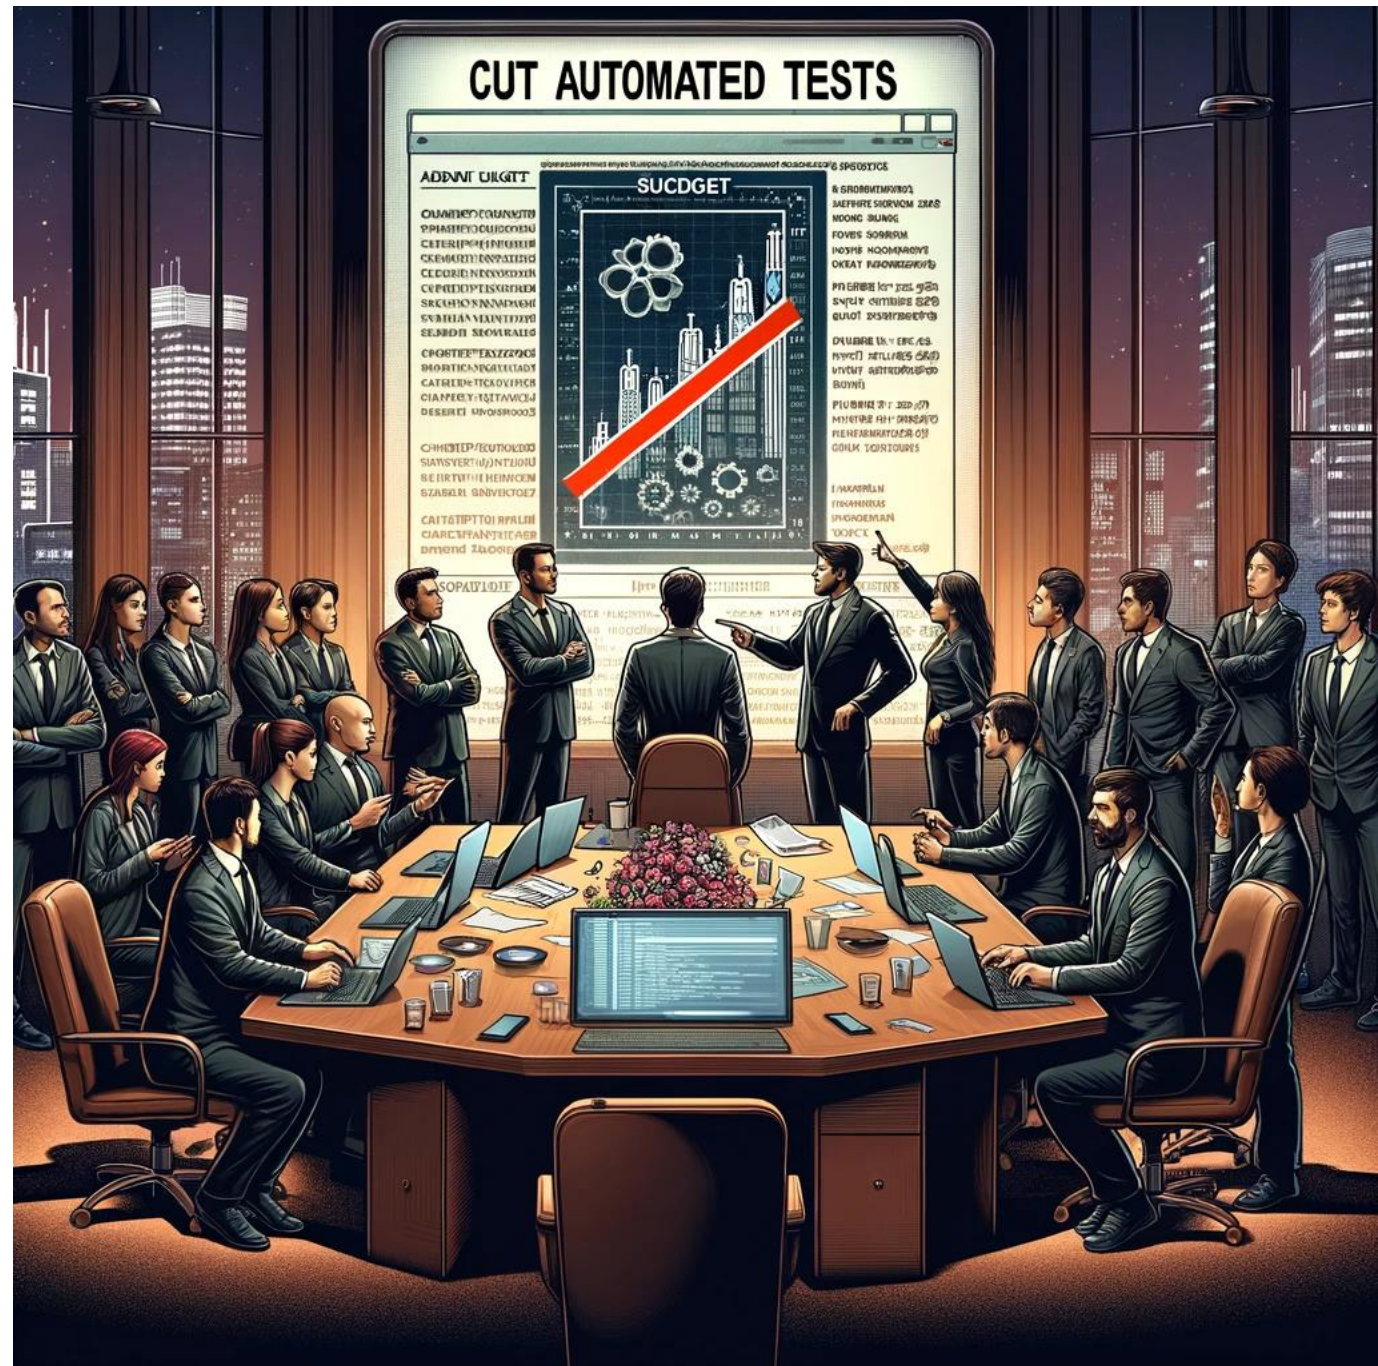

Agenda

Why am I willing to fight for it?
Arguments and pushbacks for different roles
When should we not fight for it
Q&A

Why am I
willing to fight
for it?

When a project
goes over budget,
the tests are the
first to go.

Developers

Refactor

Developers love
to clean up code

Refactor

Developers love
to clean up code

```
local procedure TransferShare(var Share: Record Share)
begin
    if Share.FindSet() then
        repeat
            CreateNewShare(Share);
        until Share.Next() = 0;
    end;
```

Refactor

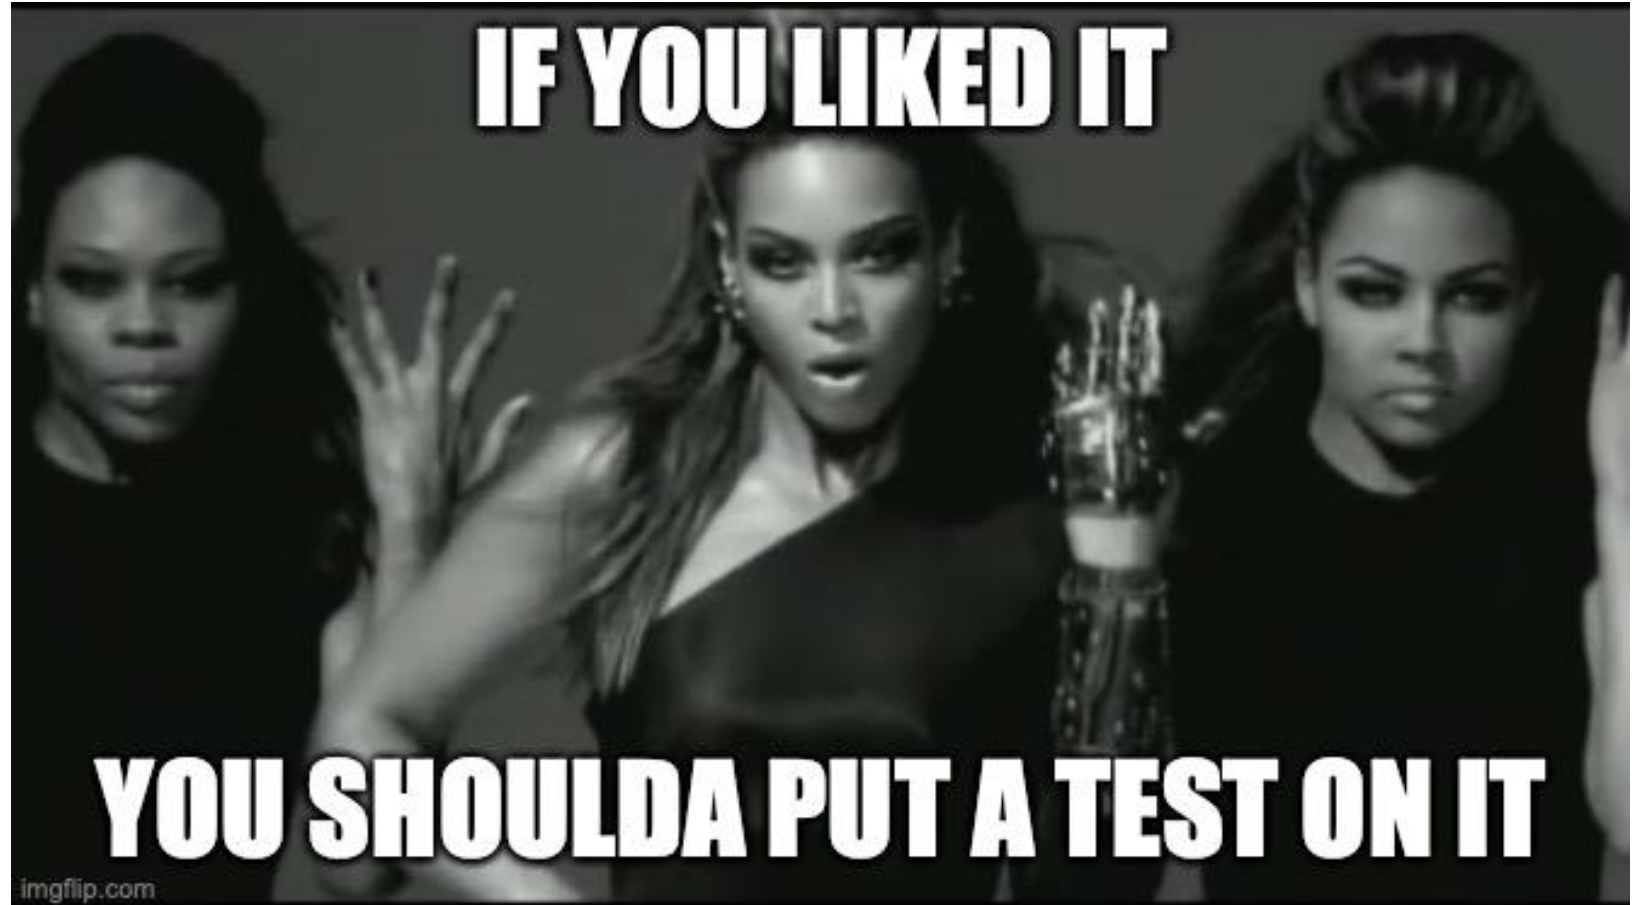

Developers love
to clean up code

it works, don't touch it.

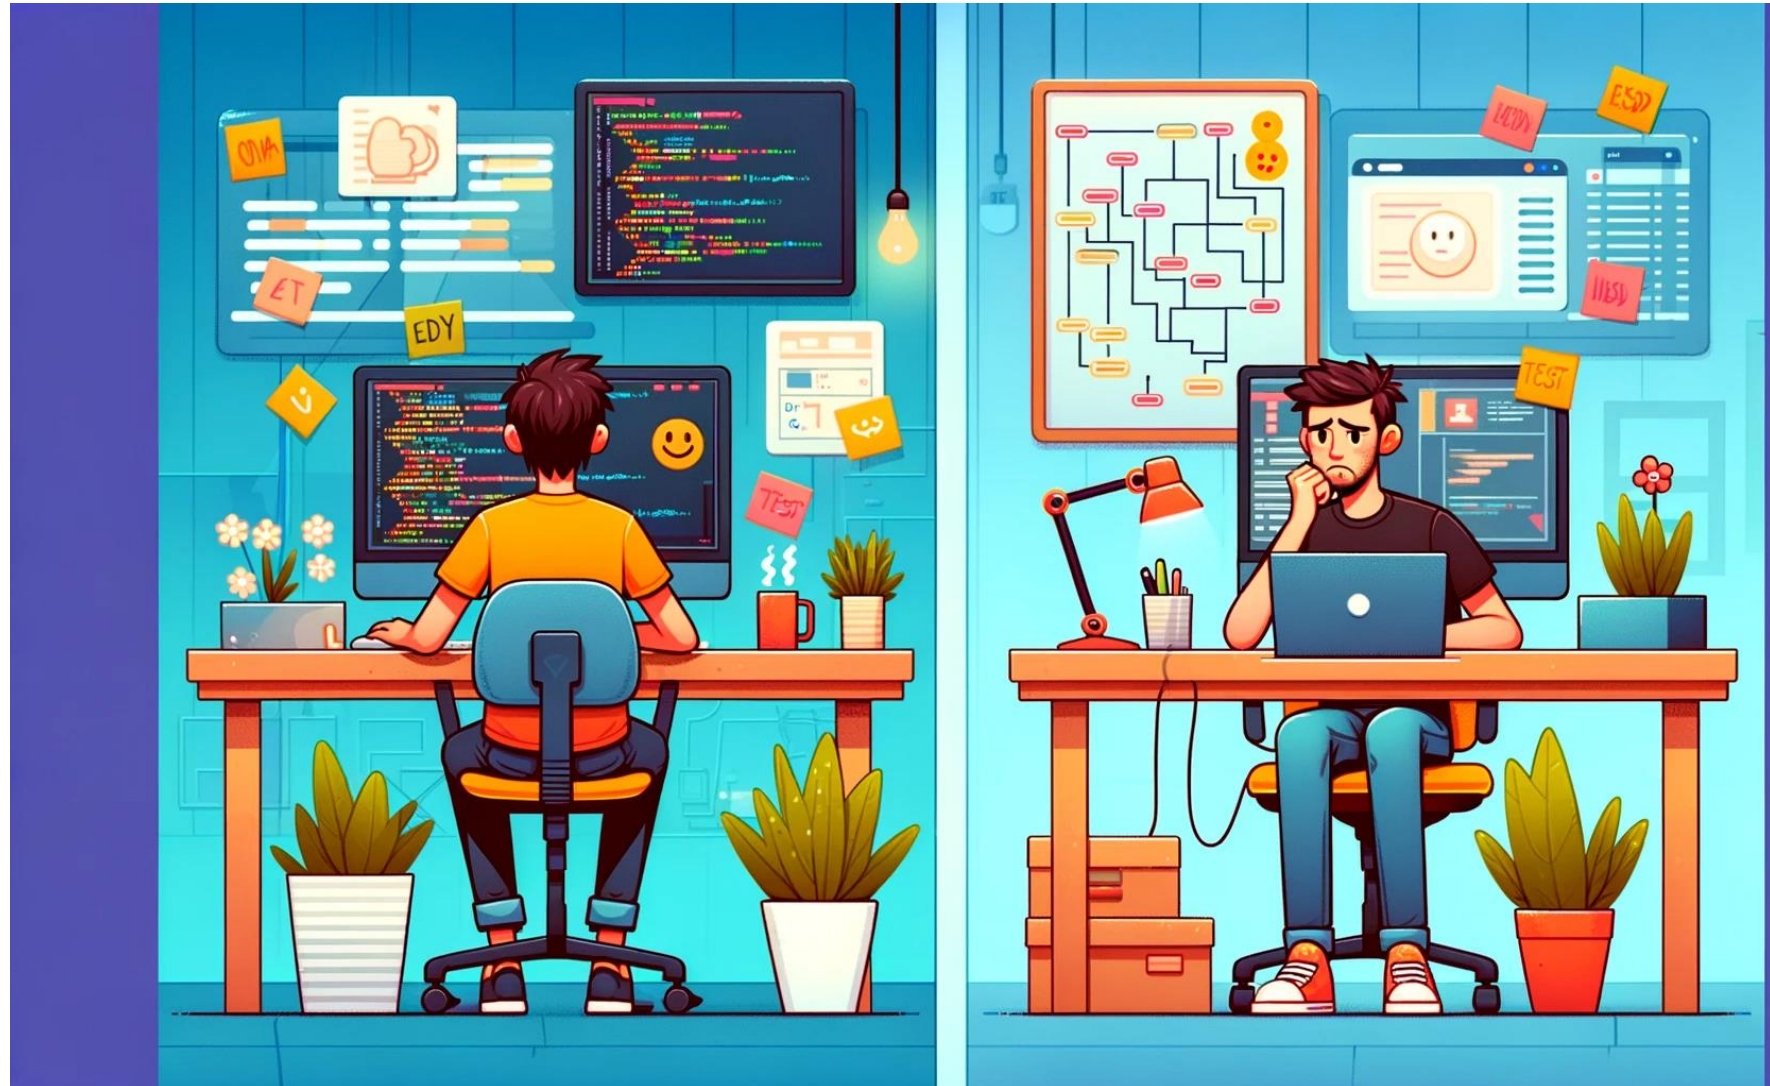

Focus and
Uninterrupted
time

Other developers
can break your
code

Developers

Features are fun,
tests are not

Developers

We don't know
how to write them

```
[Test]
0 references | Run Test | Debug Test
procedure TestSalesOrderRelease()
var
    SalesHeader: Record "Sales Header";
    ReleaseSalesDocument: Codeunit "Release Sales Document";
    LibraryAssert: Codeunit "Library Assert";
begin
    // [Given] Sales Header
    SalesHeader := CreateSalesOrder();

    // [When] Sales Header is released
    ReleaseSalesDocument.ReleaseSalesHeader(SalesHeader, false);

    // [Then] Sales Header is released
    LibraryAssert.AreEqual(true, true, ''); // Ugh, this is a bad test
end;
```

Developers

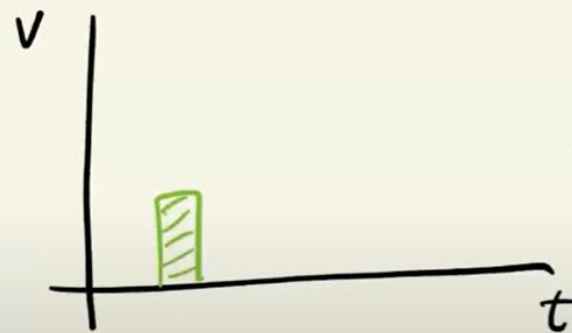

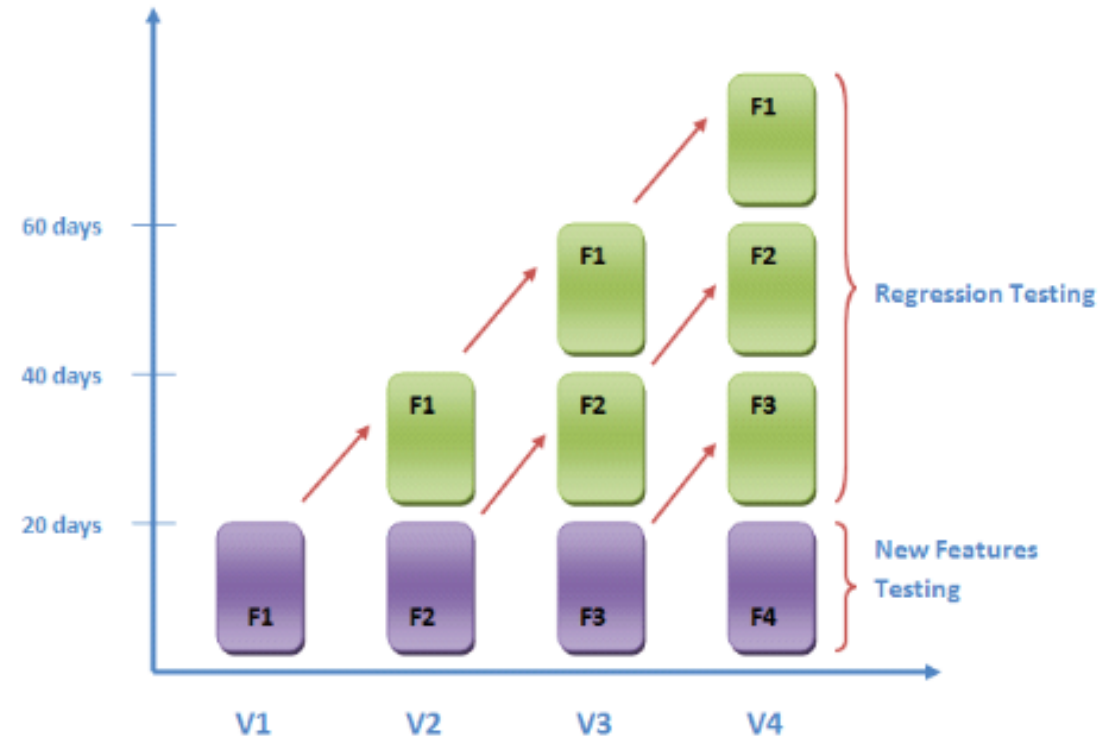

Priorities

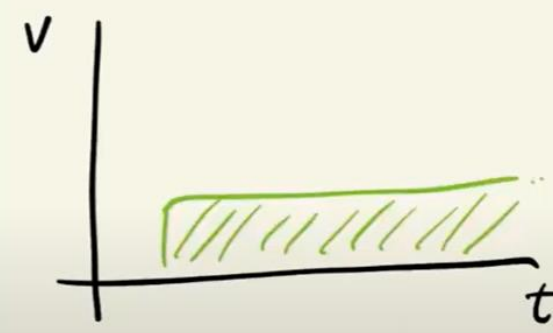

Consultants

We did not
become
consultants to be
testers

Consultants

Priorities

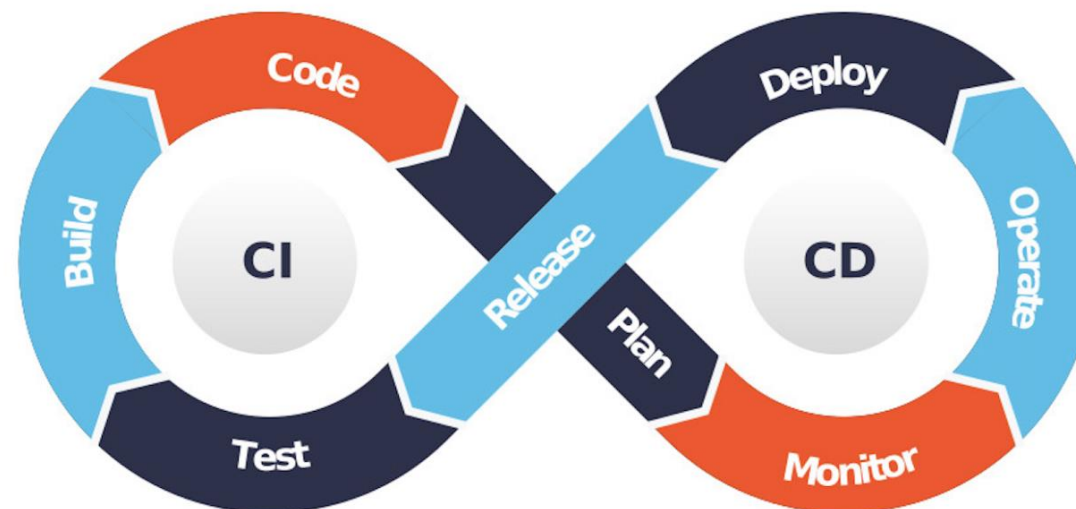

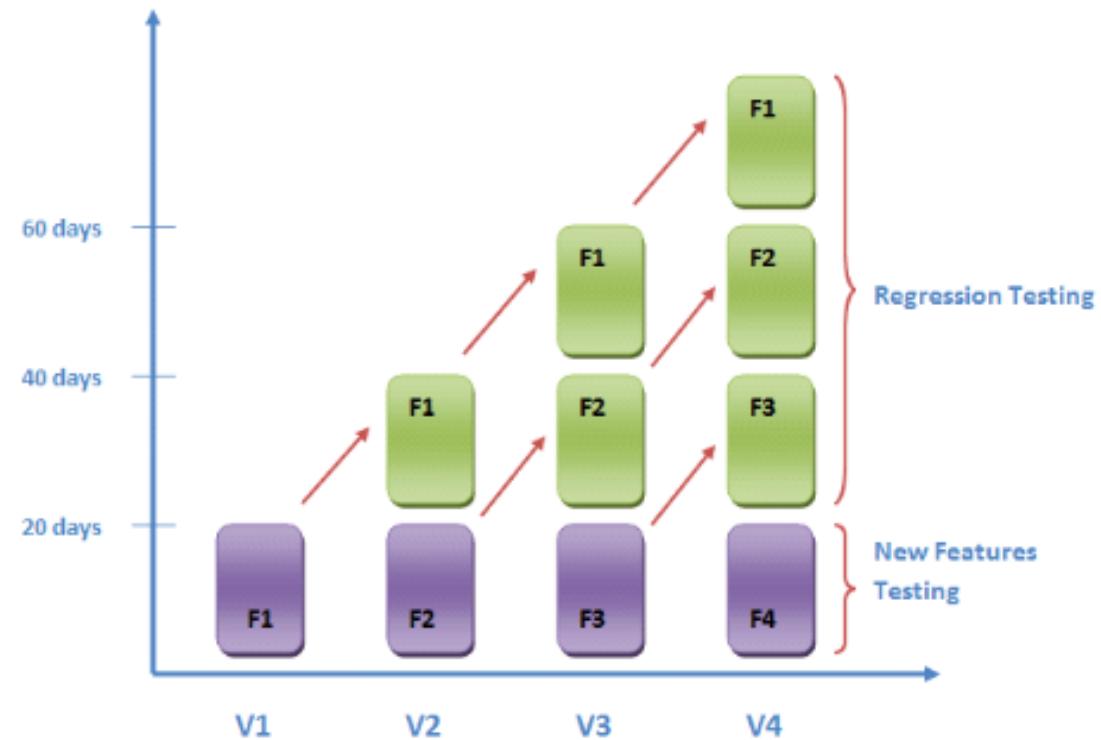

Product Owners

Unplanned bugs are hard to plan for

Product Owners

More frequent releases can help with customer adds

Product Owners

Regression testing is limited by QA size

Limitations of manual testing

Labor-intensive

Time-consuming

Prone to human errors

Hidden costs

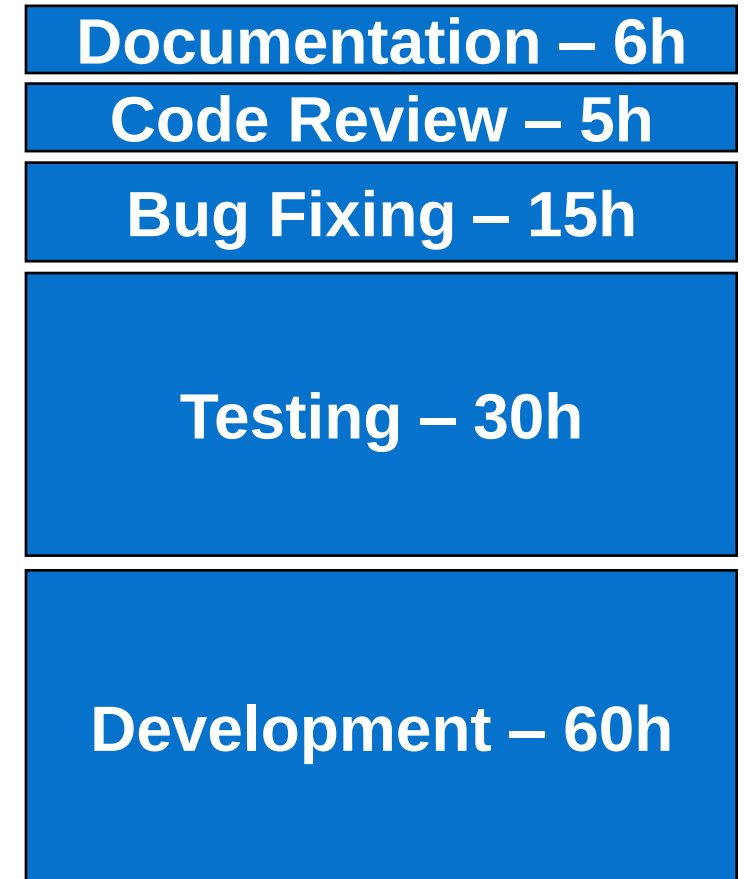

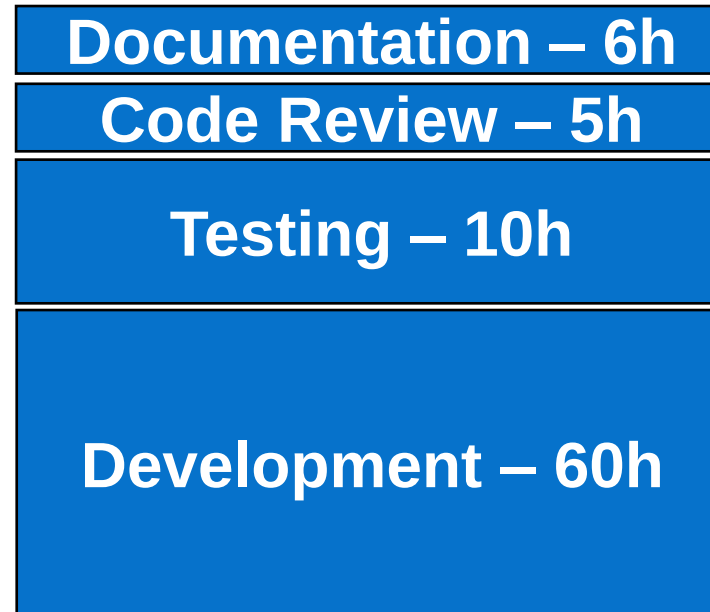

Delays in bug identification and resolution

Product Owners

“It delays feature delivery”

As solutions grow, development slows down due to regression

Product Owners

Automates tests
remedy that

Documentation – 6h
Code Review – 5h
Testing – 10h
Auto Tests – 15h
Development – 60h

Documentation – 6h
Code Review – 5h
Testing – 10h
Auto Tests – 15h
Development – 60h

Managers

They don't care
about tests

Managers

Project current
symptoms into
the future to
show the
importance

Documentation – 6h
Code Review – 5h
Testing – 10h
Development – 60h

Documentation – 6h
Code Review – 5h
Bug Fixing – 15h
Testing – 30h
Development – 60h

Managers

Project current
symptoms into
the future to
show the
importance

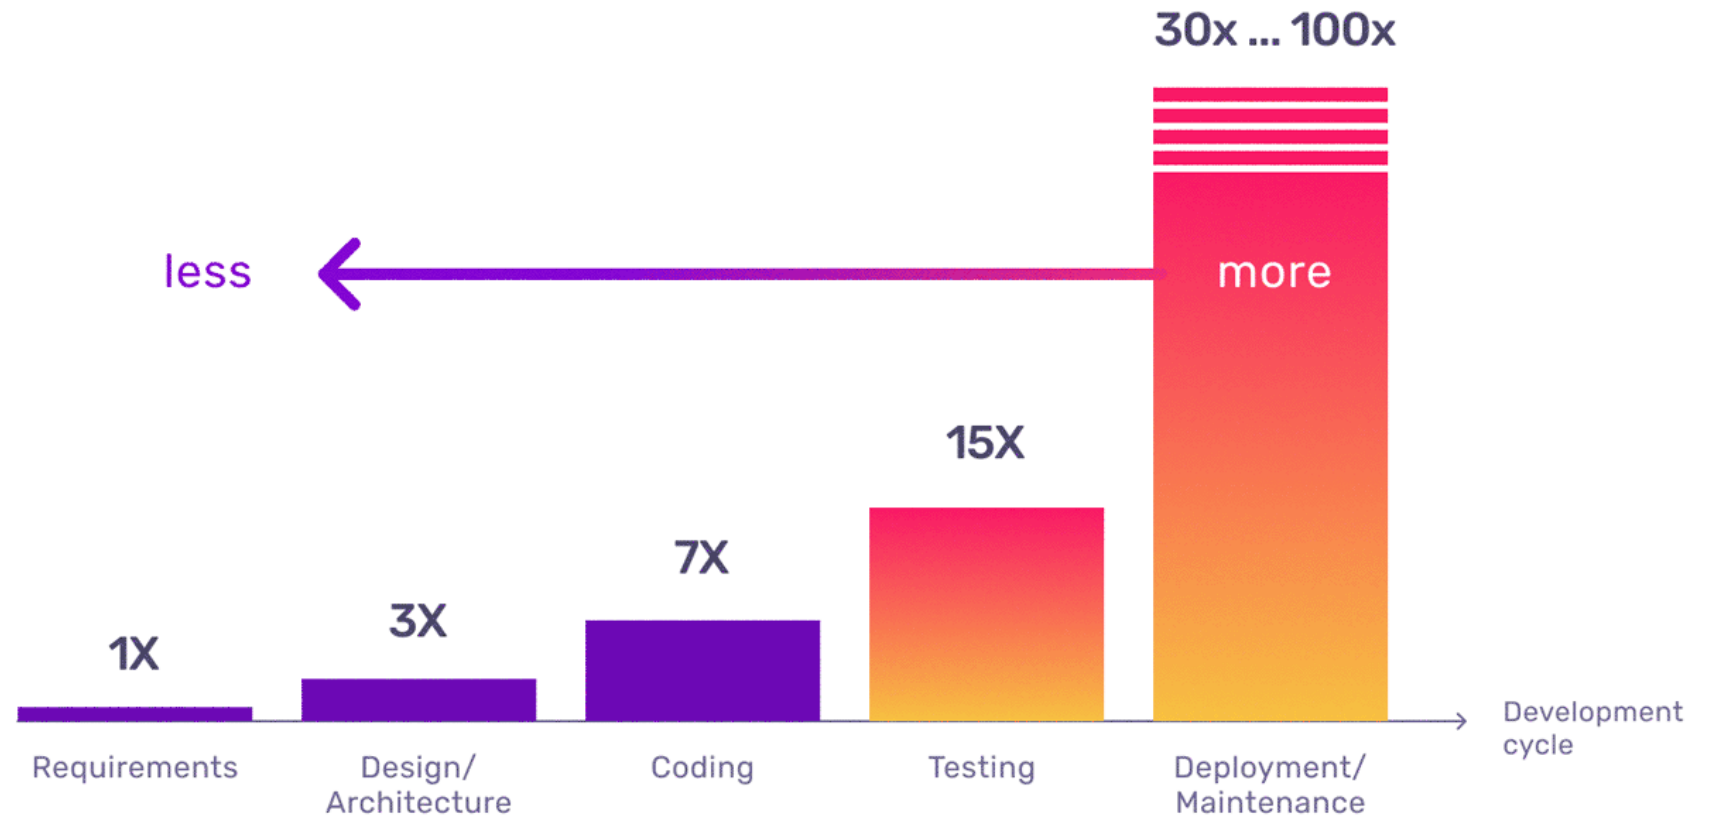

Cost of Release – 25000\$

Cost of Release – 45000\$

Managers

The cost of reputation can be just as convincing as the actual costs

Cost of Defects

The more time we save your team, the more time they have to find bugs sooner.

That Saves Money

Managers

Technical
management is
easier to
convince...but not
for BC

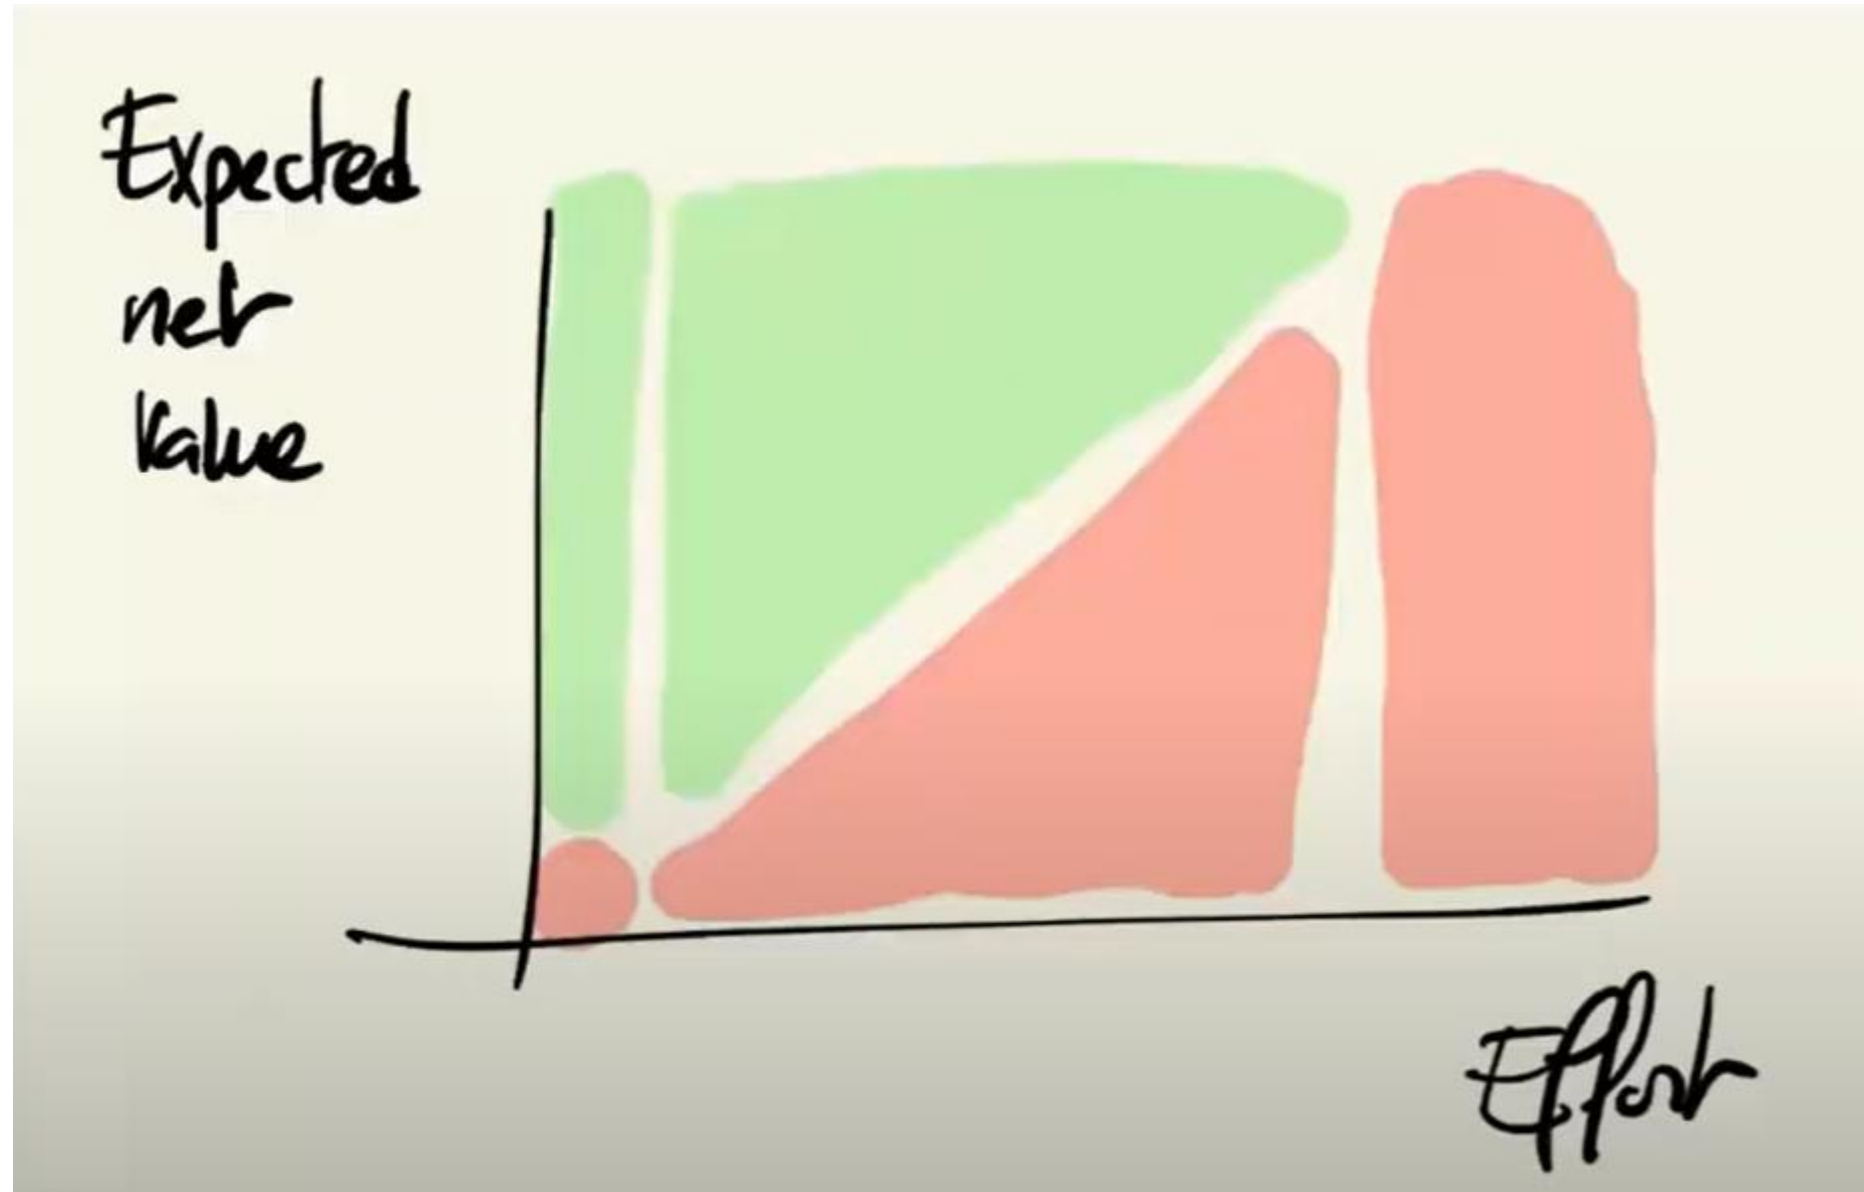

When not to fight for tests

If the company
doesn't care
about quality, it's
a losing fight

When not to fight

Don't do tests for the sake of doing tests

When not to fight

Sprint with tech debt to find a product-market fit

Recap

- Developers want to clean up code
- Consultants don't want to be testers
- Product Owners want to be predictable and iterate fast
- Managers don't care about tests, make them care
- Don't always push for tests
